| SmarterWorld             | SmarterWorld is the medium for smart technologies of networked electronic systems. From electronic, efficient components to networked subsystems and the Internet of Things. The spectrum of applications ranges from smart homes and buildings to smart cities, grids and critical infrastructures. With an eye on efficiency, SmarterWorld brings a consistent structure to the topic. In detailed technology articles and interviews, the experienced editors introduce readers to innovations, technical trends and the activities surrounding technical developments, standards and regulations. Around the clock, smarterworld.de provides information on the latest technical trends, new business models, and relevant political discussions and regulations. |

Market studies

Generate attention for important industry topics

Join us in shedding light on the key developments in the electronics industry, turning questions into answers and gaining valuable insights from users and customers!

The editorial teams of our media brands use their in-depth know-how to develop question concepts on the most important focus topics of the moment. Through a targeted application strategy, we ensure that the survey not only receives the ideal amount of attention, but also that the results are meaningful, reliable and of high quality.

You then benefit from comprehensive communication: We pick up the results in our editorial reporting, develop a high-quality paper based on the study, which also includes your content, and make this and the most important facts available to companies, the media and, of course, for your PR and marketing measures.

Implementation

- Study by the editorial staff of the electronics network with a neutral topic
- Question creation by the editorial staff
- Creation, hosting and evaluation by the editorial team

Events

Become part of our Expert Events Team!

For more than 20 years, WEKA FACHMEDIEN has been organizing around 45 national and international B2B trade congresses, tech forums, symposia and intensive seminars every year in close cooperation with the responsible editorial team on topics such as Automotive Ethernet, Battery Technology, Wiring Systems, Data Center, Digital Workplace, Embedded, EMC, HMI, Safety & Security, Industry 4.0, Internet of Things, AI, Medical Technology, Passive Components, Smart Building, Sensor Technology, Power Supply, Time Sensitive Network, Wireless and many more.

Our events impart valuable knowledge and enable cross-discipline networking. Convince yourself of our quality and bandwidth. Visit our events as exhibitor, speaker and participant.

More advantages

• Optimal target group approach
• Cost savings - no travel & travel expenses
• Logo presence in partner directory
• Exclusive sponsoring opportunities such as logo presence in the lobby, at room entry, etc.
• Possibility of qualified lead generation: contact data of participants after approval of GDPR

Virtual events

At our virtual events, exhibitors and speakers can participate in the program with high-quality keynotes, technical-oriented specialist as well as product-specific presentations. Or actively involve participants in practical workshops and Q&A discussion rounds. We create the best possible program concept adapted to time zones, visitor dwell time, lecture duration, live streaming and on-demand. The virtual platforms offer plenty of space for product presentations, videos, image galleries, documents and also numerous interaction options: Live chat, video calls, interactive polls, participant chat, direct meetings.

Face-to-face event

Meet your target group in person and use the opportunity to acquire new customers and business partners. Build your professional network. High-quality keynotes, expert-oriented presentations and hands-on workshops ensure a varied and broad event program across the entire spectrum of the topic. An exhibition with a booth allows you to showcase your products and engage in sales-oriented conversations. During extended break times, there are extensive opportunities for interaction with participants. The distinctive ambience of our locations and finest catering provide the perfect setting.

More advantages

• Live Q&A with visitors, extended presentation time
• Various sponsoring possibilities such as bags, lanyards, banners, catering, etc.
• Logo presence in partner directory
• Possibility of qualified lead generation: contact data of participants after approval of GDPR.

You expect from your marketing: impact and result. You get from B2Impact: only that. To achieve your communication goals, we always choose the most direct route. This path can lead via content marketing strategies, creative services such as events, or via targeted print and online campaigns. Because what works is what’s right.

**Story services**
Producing relevant, useful content is a must for B2B companies today. Because content has become the central criterion for business success. As a unit of a publishing house that publishes print and digital trade media for the electronics, automation, communications, medical, logistics, automotive, construction & buildings, and industrial sectors, we know the content needs of a B2B audience that expects texts to provide value and orientation. Producing good stories for thematic niches is our job - and your added value when you commission us to create high-impact stories. That’s because we combine the in-house expertise of our editors and experts at WEKA FACHMEDIEN to create your content.
And most importantly, we also optimize your existing content so that it performs better.

**Content campaigns**
Content marketing turns your marketing itself into a product.
To ensure that your content is also consumed and thus creates impact with your customers, it must be embedded in a holistic content marketing strategy.
Whether cover stories, online advertorials, editorials from defined topic worlds, customized newsletters, reader tests, employer and company profiles, success stories or social media posts.
We design integrated print and digital campaigns, using the entire spectrum of formats from text to image galleries to video in a targeted and resource-efficient way, seamlessly fitting the campaign into your marketing strategy and playing out the content either in our print and online media or on your content hub.

**Cross-industry media planning**
Benefit from our numerous media brands in the form of cross-target group and cross-industry media planning within WEKA FACHMEDIEN. Print, online, social media, events.

**Event marketing**
Arousing positive emotions and transferring them to your company is best achieved with live marketing. As organizers of more than 50 trade congresses and conferences per year, we know how to select and inspire the right target groups for your B2B event. With our expertise and experience in packaging even very cutting-edge topics in exciting event formats and creating a coherent experience for your target group, from the choice of location to the speakers, we ensure experiences with results. Not only live, but also in virtual formats.

**Translations**
Professional translations are becoming more and more important with increasing internationalization. Have your documents such as marketing materials, operating instructions, or data sheets translated by our service providers, using the correct technical terminology.
1. Order within the meaning of the following General Terms and Conditions is the contract for the publication of an advertisement or other advertises in the publisher's magazines for the purpose of distribution and for the placement of online advertising on the publisher's websites. These terms and conditions shall also apply to orders for third-party inserts in the magazines published by the publisher. Online advertising is understood to mean advertisements, banners, pop-ups, special interest and keyword placements.

2. Deviating, conflicting or supplementary general terms and conditions of advertising customers shall not become part of the contract. The publisher shall expressly reject any such terms and conditions.

3. The publisher is entitled to change these terms and conditions at any time. However, it shall inform its customers of the change in good time, at the latest one month in advance. In particular, the publisher shall inform the customer if the changes affect the online advertising in any significant way, in particular if the changes relate to aspects of the contractual relationship that are affected by this change, to adjust the affected conditions in such a way that the interests of the customer are not seriously affected.

4. The order is entered into effect with the acceptance of the customer's order by the publisher. The acceptance may be made in writing or by e-mail.

5. If an advertising agency commits advertising orders for third parties, the contract shall generally be concluded with the advertising agency, not with the client. If the client of the advertising agency is to become the contractual partner, the client must be named by the agency as the client and must provide written proof that the order has been placed with the advertising agency.

6. Advertising agents and advertising agencies are obliged to adhere to the publisher's price list in their offers, contracts and settlements with advertisers. The agency fee granted by the publisher may not be passed on to the advertising customer.

7. There shall be no entitlement to the inclusion of advertisements in specific numbers, specific issues or in specific places in the magazine. The publisher shall be at liberty to place an advertisement in a suitable position, unless the placement has been agreed for a specific number, in a specific issue or for a specific place in the magazine. The prerequisite for this is the timely submission of the print documents. If the order cannot be accepted in the requested number, the particular issue or in the particular place of the magazine, the publisher shall be entitled to place the advertisement in another number in a suitable place. Classified advertisements shall be printed in the relevant section without this requiring express agreement.

8. Placement of online advertising shall be made at the publisher's reasonable discretion, taking into account the interests of the customer to the greatest extent possible. The customer has no right to a placement of the online advertising at a certain position on the respective website. The publisher reserves the right to position the published advertisement according to the advertising material, advertising and technical requirements.

9. The customer may cancel advertising orders for online advertising after conclusion of the contract. The cancellation must be made in writing. The publisher will terminate the placement of the online advertising immediately after receipt of the cancellation notice.

10. Cancellation conditions online: Cancellation up to two weeks before the start of placement is possible free of charge. In the case of a shorter-term cancellation, the publisher is entitled to charge the following costs:
- in the event of cancellation two weeks before the placement date, 20% of the net order value,
- in the event of cancellation one week before the start of placement, 30% of the net order value,
- in the event of cancellation within 48 hours of the start of placement, 50% of the net order value,
- in the event of cancellation after the start of placement, 60% of the net order value that is still outstanding at that time.

11. The publisher is at liberty to place advertisements in a suitable position, unless the placement was agreed for a specific issue, or in the case of pecuniary loss due to slight negligence, the liability of the publisher shall be limited to the remuneration payable by the customer. In the case of claims under the Product Liability Act and in the case of injury to life, limb or health, the Publisher shall be liable in accordance with the statutory provisions.

21. The customer warrants that it is entitled to set the hyperlinks associated with the online advertising.

22. The customer must report any defects in the online advertising in writing within a period of three working days of the online advertising going live; otherwise the assertion of the warranty claim shall be excluded.

23. In all other respects, the Publisher shall only be liable insofar as it, its vicarious agents and/or legal representatives are guilty of intentional or grossly negligent conduct. This shall not apply inso far as material contractual obligations are violated by the publisher.

24. In the event of slight negligence, liability on the part of the Publisher and/or its vicarious agents and legal representatives shall be excluded in the case of financial loss with regard to indirect damage, in particular consequential damage, foreseeable damage or physical damage as well as loss of profit. In other respects, the publisher shall be liable for the pecuniary loss caused to the customer.

25. All claims of the customer against the publisher due to poor performance or defects in the online advertising will expire one year after the claim arises, unless they are based on intentional conduct.

26. If there are no special size requirements, the calculation will be based on the actual print height customary for the size type requirements.

27. The customer shall not be entitled to the inclusion of advertisements in specific numbers, specific issues or in specific places in the magazine. The publisher shall be at liberty to place an advertisement in a suitable position, unless the placement has been agreed for a specific number, in a specific issue or for a specific place in the magazine. The prerequisite for this is the timely submission of the print documents. If the order cannot be accepted in the requested number, the particular issue or in the particular place of the magazine, the publisher shall be entitled to place the advertisement in another number in a suitable place. Classified advertisements shall be printed in the relevant section without this requiring express agreement.

28. The publisher reserves the right to position the published advertisement according to the advertising material, advertising and technical requirements.

29. If the publisher discovers computer viruses on a file transmitted by e-mail, this file will be deleted immediately without the customer being able to assert any claims arising from this. The publisher shall be responsible for ensuring that the necessary agreements have been made with GEMA or other copy-right associations or copyright holders.

30. All services provided by the Publisher are subject to the timely fulfillment and performance of the Customer's obligations and acts of cooperation. In the case of audio- or video-linked advertising (e.g. banners which, when clicked on, open a pop-up window in which audio or video content is played), the customer shall be responsible for ensuring that the necessary agreements have been made with GEMA or other copyright-right associations or copyright holders.

31. All files belonging together are transmitted, the customer shall ensure that these data are sent or stored within a common directory (folder).

32. The customer shall be responsible for ensuring that the necessary agreements have been made with GEMA or other copyright-right associations or copyright holders.

33. If the files transmitted for color advertising can only be reliably processed with a color proof supplied on paper. Without a color proof, color deviations are unavoidable, which cannot trigger a price re-duction claim. In any case, a printout must be sent to the print shop by fax so that the factual correctness can be checked. A correction fax must be expressly requested by the customer. Only with correct color matching is a color correct communication guaranteed. A color proof in color is therefore always to be transmitted. The customer must ensure that the transmitted files are free of any computer viruses prior to the digital transmission of artwork. If the publisher discovers computer viruses on a file transmitted by e-mail, this file will be deleted immediately without the customer being able to assert any claims arising from this. The publisher also reserves the right to claim damages from the customer if such computer viruses inhibited the customer and caused damage to the publisher.

34. The customer shall immediately provide a replacement for knowingly unusable or damaged print documents. If the customer's advertising material is not available to the publisher, the customer shall bear the costs for the production of ordered printing material or for the production of ordered advertising material as well as for significant changes to originally agreed designs requested by the customer and for which the customer is responsible, due to delays caused by the customer's failure to provide advertising material. If any defects in the printing documents or advertising materials are not immediately recognizable, only but become apparent during the printing process or placement, the customer shall not be entitled to any claims in the event of invalid printing or defective placement.

35. The customer assures that he is the unrestricted owner of all rights of use to the advertising media. In particular, the customer terminates all copyrights and other rights of use associated with advertising rights.

36. The customer undertakes to make it recognizable as such, in particular by marking it with the word "Advertisement" and/or spatially also make it recognizable as such, in particular by marking it with the word "Advertisement" and/or spatially and in the next possible issue of the print publication and online advertising media without delay or withdraw from the contract in whole or in part. The customer shall not be entitled to any claims for damages in this respect. Amendments or additions to these general terms and conditions must be made in writing, by fax or e-mail. This also applies to amendments to this clause.

37. Any eventual responsibility for the partial or complete non-performance of the advertising shall expire one year after the claim arises, unless they are based on intentional conduct.

38. The Publisher shall not be responsible for delays in performance caused by force majeure (strike, lockout, riot, war, etc.) or by the fault of the customer, if the Publisher has made every effort to procure the advertising space. In the case of pecuniary loss due to slight negligence, the liability of the Publisher shall be limited to the remuneration payable by the customer. In the case of claims under the Product Liability Act and in the case of injury to life, limb or health, the Publisher shall be liable in accordance with the statutory provisions.

39. The place of jurisdiction shall be the register office of the publisher if the customer is a merchant within the meaning of the German Commercial Code, a legal entity under public law or a special fund under public law. The same shall apply if the customer has a registered office or habitual place of residence in the Federal Republic of Germany at the time the action is filed.

40. The law of the Federal Republic of Germany shall apply to the exclusion of the UN Convention on Contracts for the International Sale of Goods.
